# WIDERANGE PRODUCT'S LADDERS SPARES & ACCESSORIES

**“THE STOPPER” ANTI-SLIP DEVICE**  
 just place under your ladder & massively reduce the chance of it slipping. Alloy “T” plate is bonded to a “sticky” rubber base. Three sizes fit most ladders. Setting up ladders on sloping or uneven surfaces and stairs.

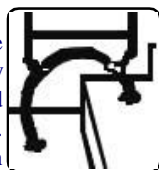

**NON-SLIP ARTICULATING RUBBERFEET**  
 Rectangular feet 5" x 2" with studs. Supplied in pairs with all fixings

**LADDER STAND-OFF ASSEMBLY**  
 A metallic side away assembly to avoid dammages while extensions Or keep ladder stand off whall

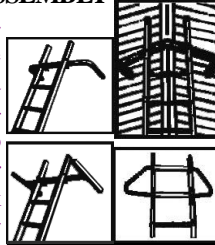

**THE LEVELER**

The Leveler is a simple design that automatically fits steps, stairs, and awkward positions. Once the device has been attached to the base of the ladder it adjusts automatically, no tools are required. The device can be fitted to aluminium and fibreglass ladders.

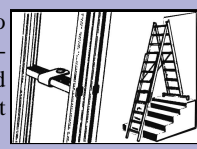

**STABILIZER ASSEMBLY**

A stabilizer is designed to create space between a ladder and wall. Instead of having to position the ladder next to your work area, you simply centre your ladder directly over your target zone. That way your work is in front of you. No awkward reaching. And no damaged eavestrough if you need to get to the roof.(the system-right /left) No tools required for assembly. Protects work surface, 46" Span ,10" Standoff from work surface , Light, strong aluminum construction , Quickly and easily mounts on any good quality ladder

**HOOK TO TIE UP SLID LADDER**

Metalic hook to tie up with sliding ladder and base ladder. Must for 2 in 1 model

**LADDER HOOKS GETTING TO THE TOP SAFELY WITH “LADDER HOOKS”** It will prevent splitting and tilting of ladders, hold ladders stable while preventing unnecessary accidents and saving lost man hours

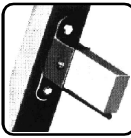

**POLE HOOKS**

Being a Slip Preventor from round surface like pole, trees etc. Made of M.S. to be fitted at the top of ladder

**FIXE LOCKING ASSEMBLY**

Locking of Ladder in open space to secure theft and mis-uses

**TUBULAR PIPE ASSEMBLY**

To hook Or rest ladder side away from wall and for firm grip. Standard width Or tailor made

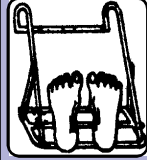

**FLOORLEV**

Metalic Firm gripper cum leveler where un-even floor

**FOOT REST**

DETACHABLE type made of M.S. Structural sections best for wide grip footing on tubular steps

**METALICK PAD**  
 Metalic pad of Round Or Square shape best for agro uses ladder

**WALL MOUNTED & LOOSE**

An eassy operated and wall fixture Or loose as required locking devices

**M.S. FOLDING BRACKET**

Made of M.S. Angle for the above 5ft. height and else of Flat for the height below instead of Aluminium to avoid over hole. Suitable for all folding type of ladders.

**SAFETY BELT**

Made of M.S. Flates detachable type to be fitted on the top of extending ladder. Best to make both hand free at extensive level.

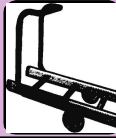

**POINTED TOP**

To convert your ladder in to fruit picking Or for Cleaner Ladder. This assembly fitted at the top of ladder

**RIDGED HOOK & WHEEL**

FOR Comfort wall Extension or pass through and to convert ladder in to roof ladder

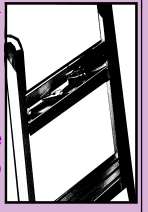

**METALIC SHOES**  
 Metalic shoes with rubber for light ladder and without rubber for heavy duty tower ladder

**TOOL TRAY FOR SINGLE LADDER.**

Fitted on the top of ladder to keep tools
