CUPS-PDF

This software is designed to produce PDF files in a heterogeneous network by providing a PDF printer on the central fileserver. It is available under the GPL and is packaged for many different distributions or can be built directly out of the source files.

WARNING: Though this is a final release no warranty of any kind is granted!

Any comments, suggestions or bug reports on CUPS-PDF are very welcome!
This program was written by Volker C. Behr at the Chair of Experimental Physics 5 at the University of Würzburg.

CUPS-PDF is also listed as a project on freshmeat.
