**Message #5** received at [submit@bugs.debian.org](mailto:submit@bugs.debian.org) ([full text](#), [mbox](#)):

**From:** Raphael Frey <freyraphael@lavabit.com>  
**To:** Debian Bug Tracking System <submit@bugs.debian.org>  
**Subject:** epiphany-browser: Headers and footers not printed, margins not respected  
**Date:** Mon, 15 Mar 2010 16:08:45 +0100

Package: epiphany-browser  
Version: 2.29.92-1  
Severity: important

Epiphany does not print any headers and footers although following configs are selected (with gconf-editor):

```
/apps/epiphany/dialogs/print_date  
/apps/epiphany/dialogs/print_page_numbers  
/apps/epiphany/dialogs/print_page_title  
/apps/epiphany/dialogs/print_page_url
```

Furthermore Epiphany does not respect printing margins anymore. The described errors did not occur in elder Epiphany versions (with Gecko rendering engine).

Please see also the bug report on Gnomes bugzilla. ([https://bugzilla.gnome.org/show\\_bug.cgi?id=605129](https://bugzilla.gnome.org/show_bug.cgi?id=605129)) I reported it there three months ago but the bug is still not fixed. Hope that it will be fixed now. Thanks in advance!

[[Message part 1](#) (text/plain, inline)]

Hi,

It seems to work fine for me, please see the attached output file.  
Epiphany and Webkit were both updated in the last few weeks, please try again and see if the problem still exists.

Thanks.

**Subject:** Re: epiphany-browser: Headers and footers not printed, margins not respected  
**Date:** Tue, 23 Mar 2010 19:28:40 +0100

Just realised my printed test case didn't have any header or footer either, even though I set them in gconf too.  
The margins are printed fine though, so my guess is header and footer support isn't available in Epiphany yet, and that may be why there isn't a config option for that in Epiphany at the moment.
